

# GPV<sup>™</sup> Wafer Check Valve

features an in-line spring assisted design to prevent flow reversal for liquids and gases. The edge guided disc and center guided stem ensure that the soft seated disc will always find its home and provide bubble tight shutoff while the 316 stainless steel construction provides superior corrosion protection.

U.S. Patent No. 5,469,884 and other Patents pending.

## Features

- Spring-assisted silent closing
- ANSI Class 150, 300/600
- 316 Stainless Steel Body, Disc & Retainer
- Inconel X-750 spring
- Hydrogen Peroxide Cured 90 Durometer Buna-N soft seat for Bubble tight shutoff
- Temperatures to 250° F
- Serrated 125-250 Ra ends
- Horizontal or vertical installation
- Meets:
  - NACE MR-01-75
  - B16.34-1988
  - MSS-SP61

## Applications

- Gas gathering lines
- Air lines
- Water lines

Size	Class	Part #	OD (dia.)	Face to Face	Weight	CV	Cracking Pressure (psi)
2"	150	2020	4.12	3/4"	2.6	21	0.4
2"	300/600	2060	4.38	3/4"	3.0	21	0.4

Notes: All dimensions are in inches. Weights are in pounds.
